

Steam University™ Seminar

A Practical Approach To Understanding Steam Systems

Steam University is a comprehensive introduction to final control applications in steam systems. The purpose of the course is to provide an overview of key steam generation and distribution applications, including boiler blowdown, boiler level monitoring, pressure relief, steam trapping, and pressure reduction. The course includes real-world examples, best practices, selection criteria and maintenance tips for effective operation.

Topics	Ideal Participants
• Introduction to Steam Systems • Pressure Relief Applications • Boiler Blowoff and Blowdown • Boiler Level Monitoring • Isolation Valve Applications • Control Valve Applications • Trapping Fundamentals • Steam Trap Testing • Pressure Reduction Applications	• Plant Managers • Maintenance Technicians • Reliability Professionals • Process Engineers • Safety Managers

Date: Tuesday, November 4th, 2025
Time: 9:00AM - 4:00PM (Happy Hour After)
Location: Vinson Process Controls - Lewisville Office
2747 Highpoint Oaks Dr, Lewisville, TX 75067
To Register: Email Laura Moen, Steam Business Dev. Manager
